Free After-sales Service Regulations

During the duration of the warranty period, if product defect occurs during normal application as stated in the Installation & Users Manual, Cautionary Notes, Direction Labels, etc., the product is applicable for after-sales service free of charge.

- Even during the warranty period, servicing is applicable for service fee charge if in case of the following situations:

:Non-defect problems

- Home visit for product explanation purposes
- For removing foreign substances from the unit
- Product reinstallation due to faulty installation by the customer

:Product defect due to customer fault

- Damage occurring from customer negligence or fault, and defect or damage occurring from wrongful repair or alteration
- Damage occurring from servicing fault by an unauthorized technician
- Damage occurring from use of unapproved parts or applications
- Damage occurring from excessive force or misuse by the customer

:Others

- Damage occurring from natural disasters (fire, flood, earthquake, etc.)
- Wearing of consuming parts

※Please safekeep the product warrantee card included in this manual.
This warrantee card is issued only once and valid within the country of your vendor and place of purchase.

※Product design and specifications are subject to change without notice for improvement purposes.
※Color of the actual product may differ from the pictures illustrated in this manual.

New Concept in Personal Hygiene

SMART BIDET

MODEL : SM-300 (Hot/Cold Water, Drain)

READ ALL OPERATING INSTRUCTIONS BEFORE INSTALLATION AND USE

Please observe the safety and caution notice within this manual at all times.
If in any doubt, please contact the manufacturer or your vendor.

CAUTIONS

- Use only neutral detergents and soft cloth when cleaning the unit. Do not use benzene or any acid chemical detergents.
- When the nozzle is clogged, use a small brush (used toothbrush, etc.) to clean the nozzle.
- If water leakage occurs from the controller unit due to defects, close the shutoff valve and request for after-servicing.
- Close supervision is necessary when the user is an infirm person or a child.

SPECIFICATIONS

Model	(SM - 300) ※(Hot/Cold Water and Drain Function)
Water Supply	Direct Connection to the Water Mains
Cleansing Nozzle	Horizontal Sliding Single Nozzle with Cover.
Material	ABS, PP, PE, Ceramic, Silicone
Size	Nozzle: L115 x W80 x H60 / Controller: L75 x W64 x H62
Weight	230g
Installation	Fits all 2-piece toilets and most 1-piece toilets

Directions for Use

Patent Pending

- Drain and Nozzle Cleansing -

When using the unit during cold seasons, the user can activate the Drain function to drain out exiting cold water from the unit which allows for warm water cleansing. At the same time, this function also cleans the nozzle unit as the water drains.

※ For women, the Drain function can also be used as an 'etiquette bell' that are found in some deluxe electronic bidets.

- Cleansing (Posterior/Feminine Wash) -

After using the toilet, activate the Cleansing function by adjusting the Water Pressure Control Knob to the desired water pressure level.

※ After washing, use toilet paper to wipe off the water.

- Water Temperature Adjustment -

Adjust the water temperature level by turning the Water Temperature Control Knob.

※ Caution: Water temperature can be affected by use of cold or hot water in other places within the same household.

ATTENTION

The 3M Double-sided tapes are required to be used on the following for better adhesion:

※ The 3M Double-sided tapes (1 big, 2 small) are included in the package.
※ Thoroughly clean the surface first before using the 3M tapes.

IMPORTANT SAFEGUARDS !CAUTION

Caution notes mentioned below are related to personal safety that should be fully observed. Disregarding these notices may lead to severe safety hazards.

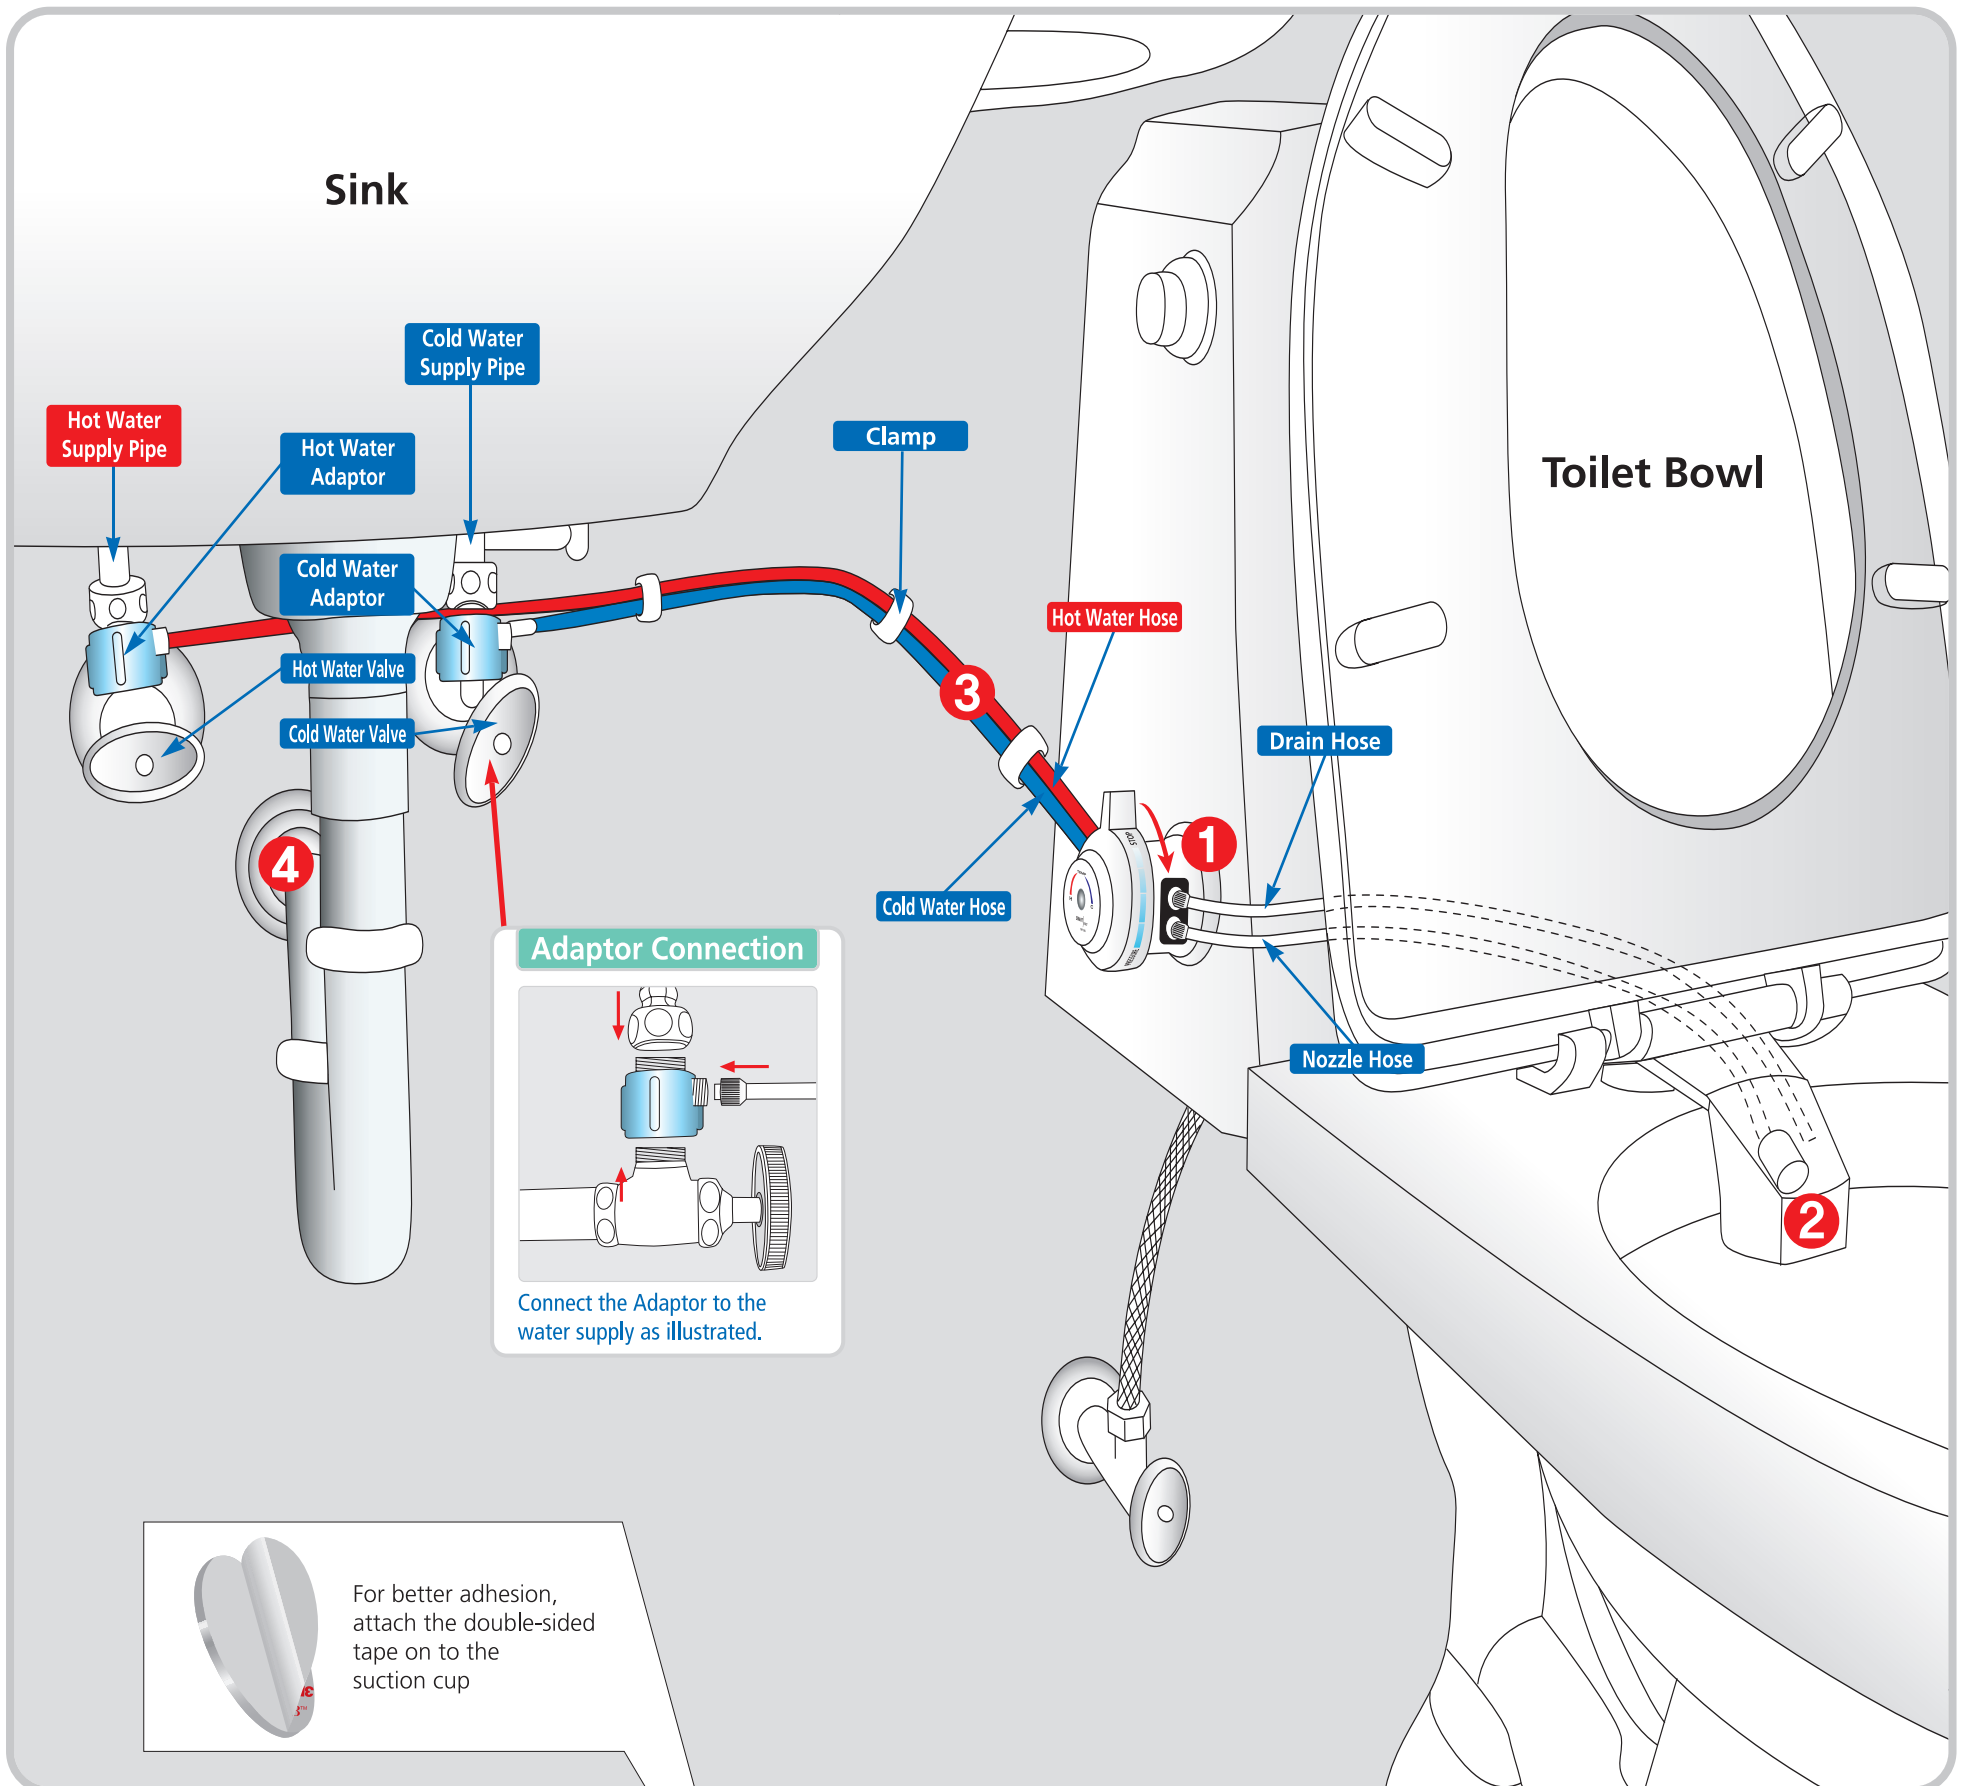

Product Identification

Parts & Components

Installation

1 Controller Installation

Clean the surface and place the suction cup

Fully tighten the nut

Fix on the Controller unit while pressing the release button

For better adhesion, attach the double-sided tape on to the suction cup

Thoroughly clean the surface where the Controller will be installed.

2 Nozzle Unit Installation

Insert the suction cups into the Nozzle Unit

- Thoroughly clean the surface of the toilet bowl by using detergents.
- Pull out the hose connected to the Nozzle Unit towards the back and underneath the toilet seat.
- Put some water on the suction cups and press down hard on to the toilet bowl after placing the Nozzle Unit into location.

※ By putting water on to the suction cups, it makes it easier to adjust the fixing location and also allows for stronger fixation.

3 Hose Connection

Carefully identify the Hot and Cold Water Connectors (Inlets)

Fitting Nut Connection

Insert the nut into the hose

Fully insert the hose into the connector

Fully tighten the nut by using the provided tool

Fully insert the hose into the connector and fasten the fitting nut tightly using the nut tightening tool.

4 Water Supply Connection

- Connecting the Hot/Cold Water Adaptor - Close the Hot/Cold Water Valves and disconnect the water pipes underneath the sink. Reconnect the water pipes with Hot/Cold Water Adaptors installed in place.

※ Carefully identify the Hot Water Pipe and the Cold Water Pipe. (Normally, the supply pipe on the left hand side is the hot water supplies. For more accurate identification, place the hand on the pipe and open the valve to check if hot water is flowing)

※ If the existing water pipe is not a flexible type, the existing metal pipe needs to be replaced by a flexible water pipe. (Flexible pipe not included)

Installation Check

- Reopen the closed Hot and Cold Water Valves and operate the Water Pressure Control Knob to check the unit operation.

- Check for any water leakages from the connecting parts.

- If water leakage is found, the relative connection should be reinstalled.

- Use the provided Hose Clamps to neatly align and arrange the hoses.
